

Algae oil rich in omega-9 for sustainable active nutrition

Consumers around the globe have an increased interest in a health-conscious, personalized, vegan, and sustainable lifestyle. Omega 3, 6 and 9 have strong consumer recognition and proven health benefits.

The algae-based Omegas are the new way to support and promote brain cognition, mood, immunity, eye and heart health.

We are unleashing the power of algae fermentation to produce sustainable active nutrition.

Produced via fermentation in a matter of days, we transform sugar cane into sustainable and high-quality nutritional ingredients that help advance diets and reduce pressure on marine resources and dependency on crops, without impacting the carbon footprint.

The AlgaVia™ algae oil portfolio includes the Omega-9 HSHO oil:

- A balance of low saturated fats with highest monounsaturated fat than any other oil.
- Light profile and neutral taste.
- High smoke point Up to 485 °F/251 °C, which means its stays stable over high heat.
- Produced in a closed system at one the biggest algae-fermentation facilities plants in the world.
- Clean source, free from contaminants, with complete traceability.
- Innovative process ensures a consistent and abundant supply of nutrients.
- Sustainably produced with a low carbon footprint.
- On-trend consumer solution: active nutrition, vegan, and sustainable.
